

The Future of Project Management

Dr. Kerzner will provide insights on:

- The growth of a new breed of project managers
- How the definition of project success has evolved and placed even great emphasis on benefits and value measurements
- An increased need for Project Managers to be adept at navigating a wide range of influencing factors such as politics, religion, virtual teams, and resources with multiple levels of capabilities.

- Project management as a strategic competency and the role of "givebacks" in the next generation of project managers

What You Will Learn

- How project management has changed and components of managing complex projects
- Enhanced Stakeholder Management approaches to attain new levels of project success
- Why some future projects will fail and ways to recover distressed projects and manage projects in crisis
- The relationship between an Enterprise Project Management (EPM) methodology and project excellence
- Why adaptive or fluid EPM systems are the future
- The importance of "givebacks" and best practices in project management
- Project management's future in the Journey of Global Excellence
- The Hexagon of Excellence – an integrated approach
- How Project Offices can be a Center of Excellence
